THIS DOCUMENT CONTAINS INFORMATION AFFECTING THE NATIONAL DEFENSE OF THE UNITED STATES WITHIN THE MEANING OF THE ESPIONAGE ACT 50 U.S.C. 21 AND 22, AS AMENDED. ITS TRANSMISSION OR THE REVELATION OF ITS CONTENTS IN ANY MANNER TO AN UNAUTHORIZED PERSON IS PROHIBITED BY LAW. REPRODUCTION OF THIS FORM IS PROHIBITED.

THIS IS UNEVALUATED INFORMATION

50X1-HUM

1. According to Rositz, which belongs to SAG Synthese, the Teesverarbeitungs-  
werk

no fuel oil of the quality prescribed by the Main Department for Chemical Products has been produced in the Rositz Plant since the end of the war. The fuel oil is now processed exclusively into Diesel fuel. The creosotes are separated in this process and yield creosote oil. Most of this creosote oil is further processed into road tar in the Rositz plant itself, but slight quantities are allocated to the Dachpappenfabrik Schkeuditz. In order to increase the production of road tar at the Rositz plant, the creosote oil produced at Fabrik Webau, Teerdestillation Koepsen, and Kombinat Goelzau, SAG plants, must be sent to the Rositz plant. This will mean that those three SAG plants will also be processing most of their fuel oil into Diesel fuel, and that the Soviet Zone shortage of fuel oil will increase.
